Flottbek Biofuture Career Days

Learn about career options and receive one out of 7 Ph.D. fellowships

4 Ph.D. positions in plant molecular science

3 Ph.D. positions in virology

To do a Ph.D. is a - if not the most - decisive step in your academic career. And Ph.D. training matters. At the same time, finding the right training place is not easy.

The metropolis Hamburg is one of the most popular cities in Europe and harbors one of the largest universities in Germany.

The Flottbek Biofuture Career Days are your chance to gain invaluable information about academic career paths in molecular biology as one of the key scientific disciplines of the 21st century.

Apply now for a funded one-week stay in Hamburg, from the 3rd to the 7th of November 2014.

Meet experts from industry, funding bodies, and academic publishers and discuss your interest with researchers at the Biocenter Klein Flottbek of the University of Hamburg.

All candidates that want to pursue a Ph.D. at the University of Hamburg are entitled to apply then for a Ph.D. fellowship in molecular plant science or in virology that will be awarded in the frame of the newly founded Degradation For Life Graduate School Hamburg (DELIGRAH).

The DELIGRAH addresses key questions of modern biology. You will earn an outstanding education with a focus on molecular biology, bioimaging, protein biochemistry and structural biology.

Application deadline: October 9, 2014

Please send your application (CV, diplomas, motivation letter) to julia.kehr@uni-hamburg.de
