Message chain and measures in the department of biology
for Covid-19 diseases of students
(Infection Message chain)

All the following measures take place regardless of the contact follow-up by the responsible health authority. All measures serve the preventive care for students of the UHH. The registration of contact persons and the resulting measures on the basis of the Infection Protection Act are carried out exclusively by the responsible health department.

The university regulations in the event of an infection or suspicion of infection are determined by the university management and apply overriding. They are published under the "FAQ on the novel coronavirus" on the University of Hamburg's homepage and can be found in the "Coronavirus general" chapter.

The Message chain in the Department of Biology is based on the university regulations and is supplemented by department information:

1. Students diagnosed with Covid 19 stay at home and
   - Immediately inform the internship leaders of all courses attended by email
   - Immediately inform the supervisor of the thesis
   The following information is required in the above notification:
     - Last name, first name, telephone and email
     - Date of positive test result
   - Send the certificate of incapacity for work to the Academic Office immediately by post.

2. Internship supervisors / supervisors of thesis
   - Immediately inform the department for occupational safety and environmental protection (arbeitssicherheit@uni-hamburg.de) and put the student office (Markus.Braendel@uni-hamburg.de) as well as the department management (ruzica.latincic@uni-hamburg.de) in cc.
   The following information is required in the above notification:
     - The information provided by the infected student (see point 1)
     - The list of participants for the course days from the last 14 days on which the infected student was present (including other supervisors and student assistants). The format of the list does not matter, but the name of the course (including the name of the small group) participants (including supervisors and student assistants) must be legible and indistinctly recognizable for each day of the course (scan, photo, Excel file).
     - The lists of participants are kept in the study office for four weeks and made available to the public health department on request.
   - In the case of thesis candidates, immediately inform the working group and people in the work environment who, in turn, had contact with the infected student.
   - inform the course participants, possibly other lecturers and student assistants
   - inform the location management of the respective institute
     IPM: torsten.franke@uni-hamburg.de
     IZ: jens.ihde@uni-hamburg.de
     IMF: jens-peter.koch@uni-hamburg.de
     IHW: Regina Schrötter (regina.schroeter@uni-hamburg.de), which forwards the information to the location management / administration of the TI

If you have any questions about further measures, the responsible specialist for occupational safety of the AU staff unit can be consulted.

Possibly. Any absences of the students are considered excused.
